

# THE SCREEN

I love the idea of using white sheets to create a screen. It's such a creative and unique approach that can really showcase the ingenuity of the people. Another option is to create a well-crafted screen in a wooden frame.

If we must use an inflatable screen, I suggest painting the classic black tubes in different colors or decorating them with Mexican decor to add some flair.

We can find stock content of a wide shot of a match to display on the screen. And maybe also, a detail of a hand holding a red card. (if we need it)
